Destination Nigeria: typography specification v2.0

Both families are released under the **SIL Open Font License 1.1** and are free for commercial use, embedding and redistribution. The licences are in `fonts_v2/`. Both are on Google Fonts and in Google Workspace.

Role	Typeface	Files supplied	Office fallback	Use
Display	**Newsreader Display**	Newsreader Display Regular, Medium, SemiBold + Italics (static, opsz 72)	Georgia	Headlines, titles, figures in editorial use. Its contrast and ball terminals belong to the same family of letterforms as the wordmark.
Text	**Newsreader Text**	Newsreader Text Regular, Medium, SemiBold + Italic (static, opsz 16)	Georgia	Long reading: report text, standfirsts, quotations, captions in print.
Sans	**Public Sans**	Public Sans Light, Regular, Medium, SemiBold, Bold + Italics	Arial	Information: labels, tables, data with tabular figures and the Naira sign, UI, forms, signage.

The variable masters (`Newsreader[opsz,wght]`, `PublicSans[wght]`) are also supplied for web and design apps that support optical sizing.

Scale (digital, px)

Token	Face	Weight	Size / line	Tracking	Use
`display`	Newsreader Display	400	96 / 0.98	-0.02 em	One line per layout at most: covers, campaign posters, the opening slide
`h1`	Newsreader Display	400	56 / 1.04	-0.015 em	Titles: document titles, section openers, slide titles
`h2`	Newsreader Display	500	36 / 1.12	-0.01 em	Sub-section headings
`h3`	Public Sans	600	20 / 1.3	+0 em	Headings inside text, card and table titles
`label`	Public Sans	600	12 / 1.3	+0.08 em	Labels and section markers. Uppercase, used once per block, never as decoration
`lead`	Newsreader Text	400	22 / 1.42	+0 em	Standfirst and executive-summary lead

Token	Face	Weight	Size / line	Tracking	Use
`body`	Public Sans	400	16 / 1.6	+0 em	Body text in digital and UI; 10 pt in documents
`body-long`	Newsreader Text	400	17 / 1.55	+0 em	Long-form print reading; 10.5 pt in reports
`caption`	Public Sans	400	12 / 1.45	+0 em	Place captions (Place, State), credits, metadata
`footnote`	Public Sans	400	10 / 1.4	+0 em	Sources, notes, legal lines
`table`	Public Sans	400	14 / 1.35	+0 em	Tables, tabular lining figures (tnum, lnum)
`figure`	Newsreader Display	400	72 / 1.0	-0.02 em	A single key figure, with its unit and source in caption size
`button`	Public Sans	600	15 / 1.0	+0.01 em	Buttons and links in UI

Why these faces

- **Newsreader** has the contrast and ball terminals of the wordmark's own lettering without imitating it. Display cuts are for titles and figures; Text cuts are for reading.
- **Public Sans** was designed as a neutral typeface for government systems. It is legible at small sizes and has **tabular lining figures** and the **Naira sign (₦, U+20A6)**, both essential for an investment brand.
- **Retired:** Playfair Display, which has no ₦ and no tabular figures, and Inter, which is the default sans of generated branding.

Rules

- One display line per layout. Size follows hierarchy, not drama.
- Sentence case for all headings. Uppercase only for short labels: Public Sans SemiBold, +0.08 em, used once per block.
- Captions name the place: *Zuma Rock, Niger State*. They are set in Public Sans at caption size, in Stone on light grounds and Paper on dark.
- Set figures, prices and dates in Public Sans with tabular figures (`font-feature-settings: 'tnum', 'lnum'`), or in Newsreader Display for a single large figure.
- Use real quotation marks (“ ”), en dashes for ranges (2026–2027), ₦ for Naira and a thin space before %.

Installing the fonts

- **Desktop:** install everything in `fonts_v2/static/` .
- **Microsoft Office:** the templates name Newsreader Display, Newsreader Text and Public Sans. On machines without them, Office substitutes Georgia and Arial. Install the fonts, or embed them (*File → Options → Save → Embed fonts*) before sharing.

- **Google Docs and Slides:** *Font → More fonts*, then add Newsreader and Public Sans.
- **Web:** self-host the variable fonts, or load them from Google Fonts.
