Quality assurance report v2.0

Automated checks: 31/31 passed. Generated by `16_SOURCE_FILES/build/qa2.py`.

Area	Check	Result	Detail
Typography	Only Newsreader and Public Sans (plus symbol fallbacks) embedded in 40 PDFs	Pass	all clean
Typography	Static font files supplied (22) with OFL licences	Pass	22
Colour	No retired v1 accent colours used in 91 v2 sources (token declarations excepted)	Pass	clean
Colour	Text colour pairs used in the system pass WCAG AA (4.5:1)	Pass	{'forest/ivory': 11.98, 'forest/white': 13.6, 'charcoal/ivory': 14.54, 'stone/ivory': 5.19, 'stone/white': 5.89, 'golddeep/ivory': 5.21, 'ivory/forest': 11.98, 'sage/forest': 6.94, 'gold/forest': 6.34}
Contacts	Letterhead carries the supplied telephone, email and web address	Pass	
Contacts	Business cards carry all supplied emails and the telephone number	Pass	
Contacts	Email signatures exist for general, Eddie Madaki and Lulu, with correct addresses	Pass	
Contacts	Homepage footer carries every supplied contact	Pass	
Contacts	Presentation closing layout carries every supplied contact	Pass	
Contacts	No contact placeholders remain where real details were supplied (22 Word templates)	Pass	clean
Photography	Every library photograph has a register row (9) and every rejection a reason (4)	Pass	9 accepted, 4 rejected
Photography	Licence status is recorded honestly as 'to be confirmed by client' (no invented licences)	Pass	

Area	Check	Result	Detail
Photography	Rejected images (Indonesia, Mauritius, composite) are used nowhere (the guidelines show them only as greyed, labelled examples of what not to publish)	Pass	none
Photography	Supplied originals kept untouched alongside graded masters	Pass	
Photography	No illustrated placeholders presented as photography remain	Pass	
Plates	Engraved plates keep the true proportions of the place (no stretch)	Pass	all within 0.5 %
Plates	Plates are pure vector (no embedded raster) in SVG and PDF	Pass	16 SVG
Logo	Logo masters contain no raster images	Pass	12 SVG
Logo	Retired variants (stacked, horizontal, landscape symbol, gold roundel) removed	Pass	removed
Logo	Primary master reuses every supplied path verbatim (24/24)	Pass	24/24
Editability	All Word templates open (python-docx)	Pass	22/22
Editability	PowerPoint has a real master with 19 layouts and theme fonts Newsreader Display / Public Sans	Pass	19 layouts, 16 sample slides
Editability	POTX declares the template content type	Pass	
Editability	Social templates are data-driven (content.json) with live HTML sources	Pass	
Editability	Lottie files are valid Bodymovin JSON and render in lottie-web (frames in lottie_test/)	Pass	4
Rendering	28 social PNGs at exact platform sizes	Pass	ok
Rendering	Event print PDFs are at true physical size	Pass	{'DN_name-badge_A6_print.pdf': '105×148 mm', 'DN_roll-up_850x2000mm_print.pdf': '850×2100 mm', 'DN_media-wall_3000x2400mm_print.pdf': '3000×2400 mm', 'DN_wayfinding_A2_print.pdf': '420×594 mm', 'DN_invitation_5x7in_pr…
Motion	Brand film in 4 formats, 25.0 s, 30 fps, with soundtrack	Pass	{'DN_motion_G_brand-film-25s_16x9_1920x1080.mp4': (1920, 1080, '30/1', 25.0, True), 'DN_motion_G_brand-film-25s_9x16_1080x1920.mp4': (1080, 1920, '30/1', 25.0, True), 'DN_motion_G_brand-film-25s_4x5_1080x1350.mp4': (1…

Area	Check	Result	Detail
Motion	Plate loop is seamless (first and last frames match)	Pass	mean abs diff 0.000
Sound	Film score normalised to −16 LUFS (±1)	Pass	-15.0 LUFS
Motion	Retired v1 motion (A–E, D loops) removed from the deliverable folders	Pass	removed

Manual review (visual, from renders)

Every v2 deliverable was rendered and inspected as an image during the rebuild. These defects were found and fixed: - The engraved plates were stretched about 25 % vertically by a non-uniform resize. The cropping now keeps the photograph's true proportions, and every dependent file was rebuilt. - The Word templates rendered titles in Calibri because theme-font attributes overrode the brand font. Theme attributes are now stripped from styles and from the document defaults. - Social layouts: a sun disc overlapped contact text (1:1), a place title wrapped onto its standfirst (16:9), statement and figure posts were top-heavy, and the contact plate showed sky hairlines behind the logo. A quiet-sky plate was added. - The website hero cropped out the visitor at Agbokim. The crop was rebalanced. - On the plate-paper background, the sun drifted away from the rock after the plate correction. It was repositioned. - In the guidelines, the contents page numbers were wrong, a plate tile overflowed, and the quick reference printed landscape. All three were fixed. - In the film, the photograph is checked to sit exactly on its plate during each dissolve, with frames inspected at 5 fps through both transitions. Cuts land on the downbeats of the score.

Known limitations

- **Photography rights:** the supplied images carry no photographer or licence data, and several look like web downloads. They are used as layout material. Each must be cleared before publication.
- **Tarkwa Bay:** the location is identified only by the file name, and the turquoise water and white sand are unusual for Lagos. The image is used only on a presentation board. Confirm it before captioning.
- **Low resolution:** five supplied images are under 800 px. They are used only at small sizes (grid tiles, thumbnails). In the 9:16 film, the Zuma Rock photograph is enlarged about 1.4×.
- **Website address:** `destinationnigeria.org` is inferred from the email domain. Confirm it before print.
- **Office fonts:** Newsreader and Public Sans must be installed, or embedded in the file, for Office documents to render as designed. Without them, Office substitutes Georgia and Arial.
- **Connectors:** the Adobe, Canva and Figma connectors could not be reached from this environment (proxy 403). Files are delivered as open formats (SVG, PDF, DOCX, PPTX, HTML) that import into those tools.
