The land, drawn and photographed.

Destination Nigeria shows the country as it is. Nothing in this system is invented: every place is real, captioned and credited.

The logo: an inselberg and a sun on a horizon, above the name.

The plate: Zuma Rock, engraved from a photograph.

The place: Zuma Rock, Niger State.

One idea

The logo is a drawing of a real kind of place. The identity extends that drawing in two honest ways: photographs of real places, and engraved plates traced from those photographs.

One structure

Every layout is divided by a horizon, the way the logo is: land above, words below. The horizon is a photograph's edge, a plate's edge or a single hairline.

One sun

Sun Gold is the sun: the disc in the logo, one disc in a plate, one figure or one call to action. It is never decoration.

Experience. Invest. Explore.

The proposition is set in sentence case with full stops, in Newsreader Display. It is a sign-off, not a headline on every piece.

Experience.

Nigeria's places, culture, food, festivals and hospitality, met first-hand.

For travellers and the diaspora.

Invest.

Tourism is a coordinated, investable sector with real projects and verified information.

For investors and partners.

Explore.

Landscapes from coast to plateau to savannah, with the routes made clear.

For everyone.

Essence

Horizons, opened.

Promise

We will show you Nigeria as it is: varied, creative and full of opportunity, and give you what you need to experience it, invest in it and explore it with confidence.

The master logo

Landscape. The inselberg, its neighbour and the horizon swashes, in Forest and Ridge.

Sun. Sun Gold. The only gold in the logo.

Destination. A high-contrast serif wordmark with a river-like tail on the D.

NIGERIA. Spaced capitals beneath.

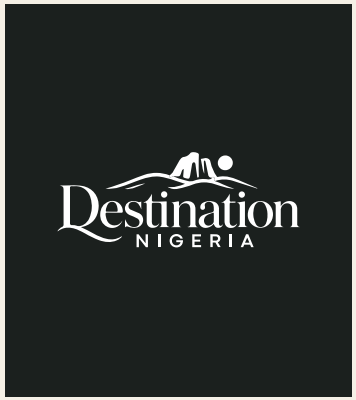
The master is the supplied full-colour artwork, preserved exactly. The reversed version corrects one misplaced i-dot in the supplied Asset_1. Nothing else has been redrawn.

Files: 02_LOGO_MASTER_FILES (SVG, PDF, EPS, PNG).

Colourways

Full colour on Paper or White: the default.

Reversed on Forest, Ink or dark photography.



White: one colour, on busy dark grounds and video.

Forest: one-colour print.

Black: newsprint and stamps.

Small sizes

Below 160 px or 35 mm, use the small-format version. It drops the hairline secondary horizon and adds an optical stroke to NIGERIA.

The roundel

The horizon roundel is used only where the full logo cannot be read: avatars, app icons and favicons. Never use it as ornament or next to the logo.

Clear space and minimum size

ITEM	RULE
Clear space	1x on every side, where x is the height of the lowercase n (about 11 % of the logo's width).
Minimum size, primary	35 mm in print · 140 px on screen
Minimum size, small format	25 mm · 100 px
Minimum size, roundel	8 mm · 16 px
Placement	Top left or bottom right in most layouts. Never centred over a photograph's subject.

Misuse

Don't stretch or squash it.

Don't recolour it.

Don't rotate it.

Don't add shadows, glows or bevels.

Don't enclose it in shapes or seals.

Don't place it over busy photography.

Don't fade it or use it as a watermark.

Don't retype it.

Ten colours

Forest, Ridge and Sun Gold come from the logo. Paper and the neutrals were developed for the system. Photography brings every other colour.

Forest

#103428
RGB 16 52 40
CMYK 85/45/75/60

The brand's voice. Wordmark, headlines, text on paper, the dark ground of covers and screens.

Ridge

#2C5040
RGB 44 80 64
CMYK 75/35/65/40

The mountain tone in the logo. Second surface on Forest, chart series, rules on dark grounds.

Sun Gold

#E8A432
RGB 232 164 50
CMYK 5/38/88/0

The sun, and only the sun: the disc, one key figure, one call to action. Never text on paper. Under 3 % of any layout.

Paper

#F5F0E6
RGB 245 240 230
CMYK 2/4/9/0

The default ground for print, slides and web. A warm, uncoated-paper white.

White

#FFFFFF
RGB 255 255 255
CMYK 0/0/0/0

Reversed logo, UI surfaces, photography mounts.

Ink

#1B201E
RGB 27 32 30
CMYK 70/55/60/75

Body text in long documents, the darkest ground behind photography and film.

Stone

#5F6662
RGB 95 102 98
CMYK 55/40/48/30

Captions, metadata, footnotes, secondary text. Passes AA on Paper and White.

Haze

#E7DFCF
RGB 231 223 207
CMYK 8/10/20/0

Hairlines on Paper, table bands, the second paper tone.

Sage

#A9BFA9
RGB 169 191 169
CMYK 35/12/35/0

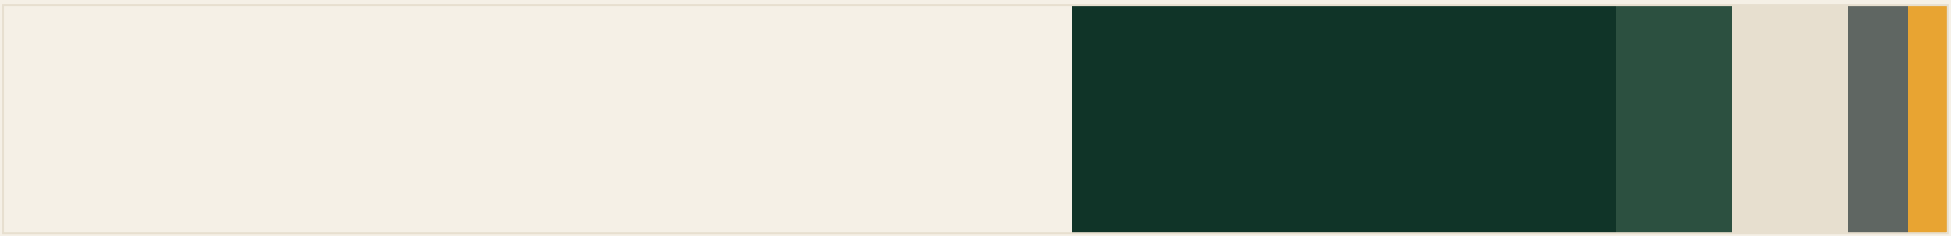
Data only: the second chart series and map land. Not a background colour.

Gold Text

#8A5A0C
RGB 138 90 12
CMYK 30/60/100/25

Accessible gold for figures and links on Paper (AA for text). Used where Sun Gold would fail contrast.

Proportion and rules



Typical proportion: Paper 55 % · Forest 28 % · Ridge, Haze and Stone for structure · Sun Gold under 3 %.

Sun Gold is the sun

Use it for the disc, one figure or one call to action, never more. Never set text in Sun Gold on Paper (1.9:1 fails). Use Gold Text #8A5A0C (5.2:1).

No effects

No gradients, glows, tints or overlays on photographs. If text needs a quiet ground, move it off the image into the Paper band. That is the horizon composition.

Data

Charts use Forest, then Sage, then Gold Text. Rules and table lines are Haze, with a Forest rule under headers. No tinted table fills.

Two families, three roles

Aa

Newsreader Display

Titles and single large figures. Regular, Medium and SemiBold, with italics.

Zuma Rock, Niger State

Aa

Newsreader Text

Long reading: standfirsts, report text, quotations.

At first light the rock turns from grey to amber. Bring water and good shoes.

Aa

Public Sans

Information: labels, tables, data, interfaces and signage. Tabular figures and the Naira sign.

₦ 1,250,000 · 0123456789

All three are SIL Open Font License 1.1. They are free for any use, installed from 03_COLOR_AND_TYPOGRAPHY/fonts_v2, and available in Google Fonts and Google Workspace. Office fallbacks: Georgia and Arial.

Hierarchy

Size follows hierarchy, not drama. One display line per layout. Sentence case everywhere; capitals only for short labels.

LABEL

A title says the conclusion

A standfirst tells the reader what the page is for, in one or two sentences.

Body text in Public Sans is neutral and legible. Keep paragraphs short. Name the place, the dish, the festival and the person. Use numbers only when they are sourced.

Idanre Hills, Ondo State

TOKEN	FACE	SIZE / LINE
display	Newsreader Display 400	96 / 0.98
h1	Newsreader Display 400	56 / 1.04
h2	Newsreader Display 500	36 / 1.12
h3	Public Sans 600	20 / 1.30
label	Public Sans 600, caps +0.08 em	12 / 1.30
lead	Newsreader Text 400	22 / 1.42
body	Public Sans 400	16 / 1.60
caption	Public Sans 400	12 / 1.45
figure	Newsreader Display 400	72 / 1.00

Details

Captions name the place

Every photograph and plate is captioned with its place and state. The caption is the system's signature detail.

Agbokim Waterfalls, Cross River State

Labels, sparingly

Public Sans SemiBold, capitals, +0.08 em, in Gold Text or Stone. Use one per block, as a signpost and never as decoration.

INVESTMENT OPPORTUNITY

Figures

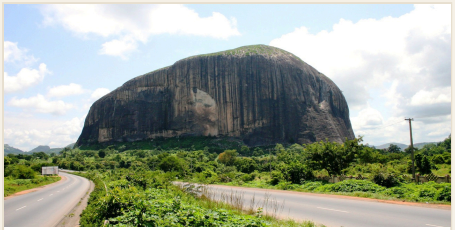
Tables use tabular lining figures, right-aligned. A single key figure may be set large in Newsreader Display, with its unit and source in caption size.

774

Local government areas. Source: Constitution of the Federal Republic of Nigeria, 1999.

The horizon composition

Every layout is divided by a horizon, the way the logo is. Its height changes with the job, so compositions vary while the system stays recognisable.



Title

Low horizon, 70 : 30. Campaign, social, film.

Title

Middle, 50 : 50. Openers, invitations, web hero.

Title

High, 30 : 70. Reports, proposals, data.

Title

No image: type with a hairline horizon.

Plates, grid and structure

Pl. 01 Zuma Rock, Niger State

The plate composition

An engraved plate is mounted on Paper with a wide margin and captioned like a museum print, with its plate number. Use it for covers, certificates, section openers and premium print.

Grid

Print uses a 12-column grid with 20 mm outer margins on A4 and 6.5 % of the shortest side on social formats. Corners are square: no rounded cards, no pills, no shadows.

Columns, not cards

Group information under a Forest hairline, never in boxes. Three columns only when there are three equal ideas.

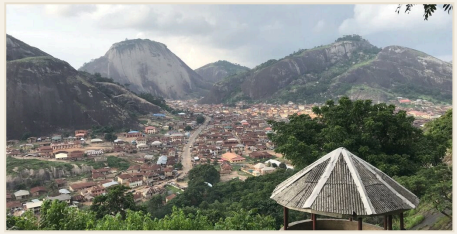
Real places, honestly graded

Photography leads wherever a place, person or food is meant. Use only verified, licensed images of the place named, always with a caption.

As supplied.

Graded: a gentle curve, saturation reined in, shadows towards Forest, highlights towards Paper. Nothing added or removed.

Agbokim Waterfalls, Cross River State



Idanre Hills, Ondo State

Obudu plateau, Cross River State

Lekki–Ikoyi Link Bridge, Lagos

What we will not publish

Three of the supplied images were rejected because they would misrepresent the destination.

Rejected. Crystal Bay, Nusa Penida: Bali, Indonesia.

Rejected. Almost certainly Chamarel Falls, Mauritius.

Rejected. A digital composite of places that do not appear together.

Use

Natural light, real activity, people with consent, specific places. Caption every image with place and state.

Avoid

HDR, sky replacement, heavy filters, AI-generated scenes presented as real, and images of other countries.

Record

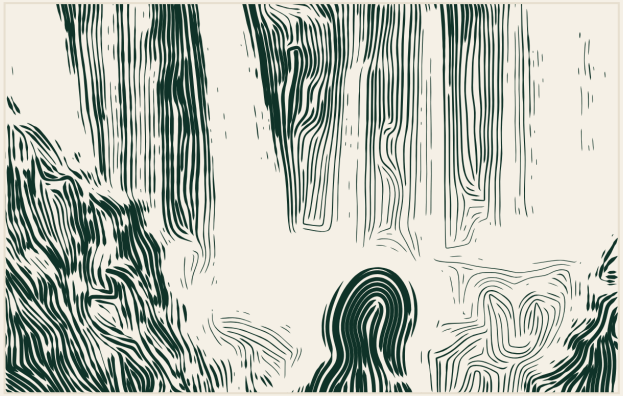
Every image needs its photographer, licence and releases in 06/SOURCE_RECORDS/image-register.csv before publication.

The engraved plates

The illustration language of the brand. Vector, so it reproduces at any size, from a business card to a roll-up banner.

Pl. 01 Zuma Rock, Forest ink

Pl. 01 Paper ink on Forest



Pl. 02 Agbokim Waterfalls

How they are made

Lines follow the form of the land, swelling in shadow and thinning to a hairline in light, as in banknote and survey-plate engraving. Each plate is traced from a verified photograph of the place it names.

Rules

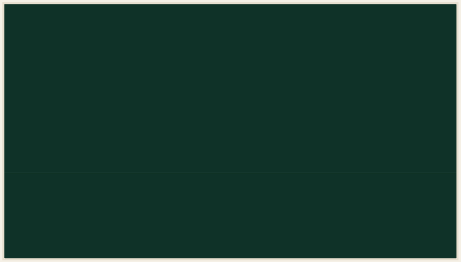
Use one ink: Forest, Paper or Ridge (tone-on-tone on Forest). The only added colour is the logo's Sun Gold disc, in open sky. Never stretch a plate, and never use it for a place it was not traced from.

New plates

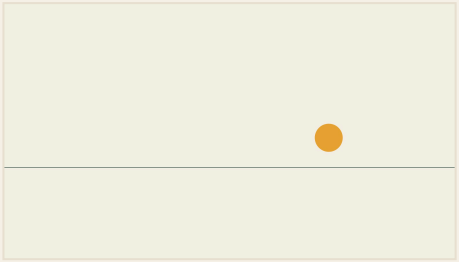
Add a verified high-resolution photograph to the library, then run 16_SOURCE_FILES/build/plates.py. Plates work best on strong silhouettes.

Eight grounds

Paper horizon. Minimal corporate, light.



Forest horizon. Minimal corporate, dark.



Horizon and sun. Campaign.

Plate paper. Editorial and premium print.

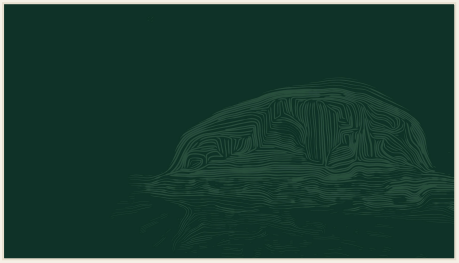


Plate forest. Premium presentation, dark.

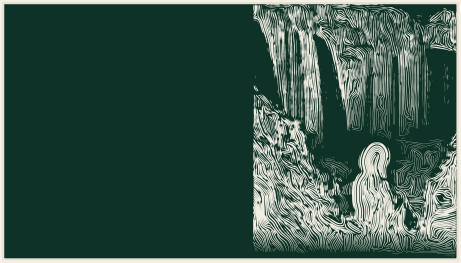

Plate night. Events.

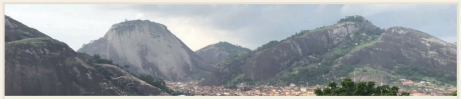
Photo horizon. Photo-led.



Report band. Investment and reports.

Social

Seven compositions with distinct jobs, in 4:5, 1:1, 9:16 and 16:9. Copy lives in content.json; every place is captioned.

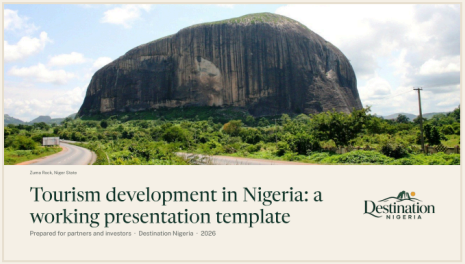
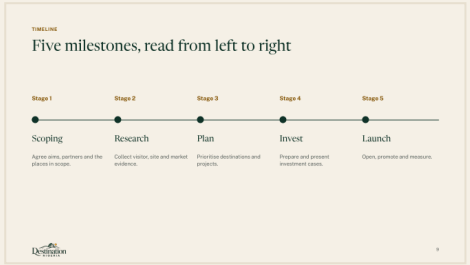
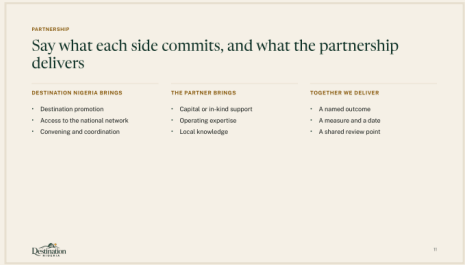
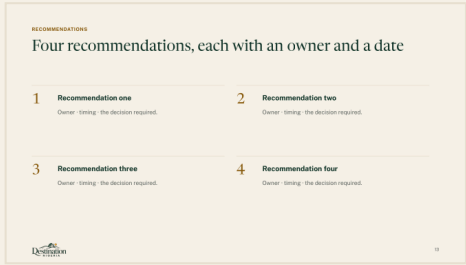
Presentation

Write the conclusion as the title. Layouts are built for the work a tourism body actually presents.



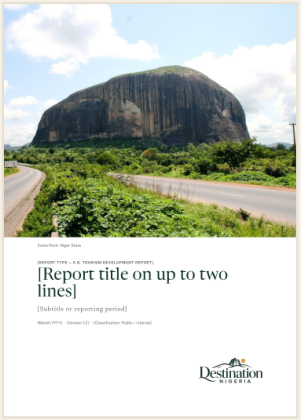


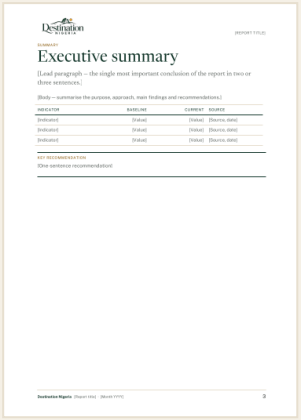


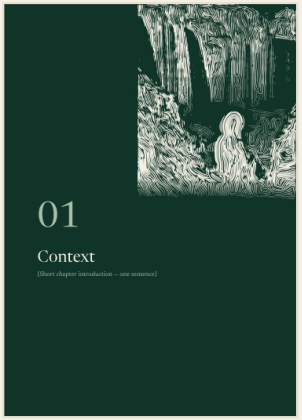


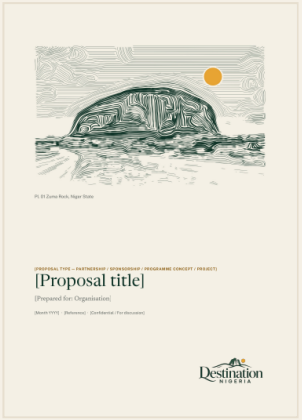
19 layouts on a real slide master: covers, section opener, executive summary, two columns, research finding, chart, key figures, timeline, investment opportunity, partnership, financial table, recommendations, quotation, photograph, closing and contact, title only and blank.

Documents









Editorial, not decorated

Small logo, generous margins, Newsreader titles, Public Sans text. Tables have a Forest rule and Haze hairlines, with no fills.

Real details only

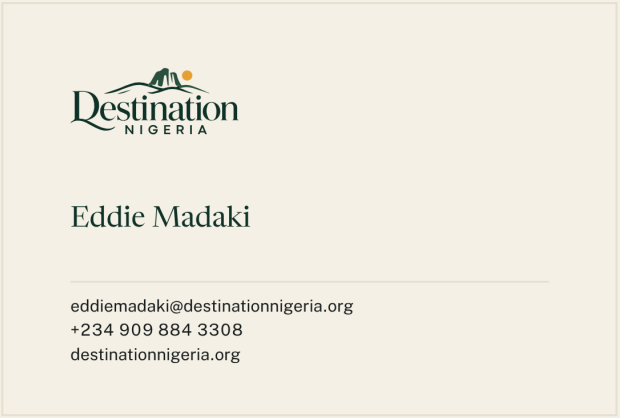
Contact details are the supplied ones. Anything unverified (addresses, registration numbers, figures) stays a bracketed content control.

Files

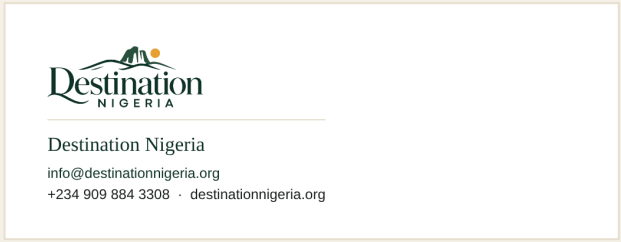
22 Word templates with PDFs and DOTX, plus calculating spreadsheets, in 09_DOCUMENT_TEMPLATES.

Stationery

Front: Zuma Rock tone-on-tone.



Back: name, email, telephone, web.



Email signature (general, Eddie Madaki, Lulu).

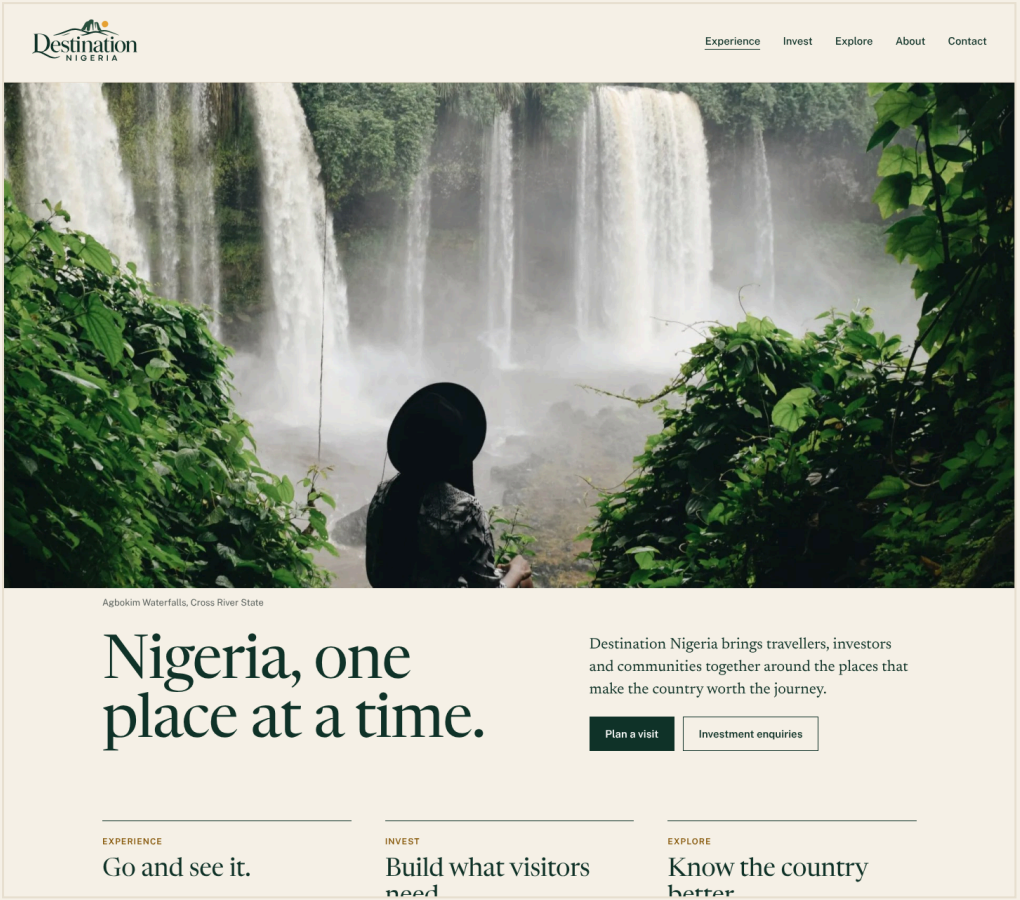
Contacts

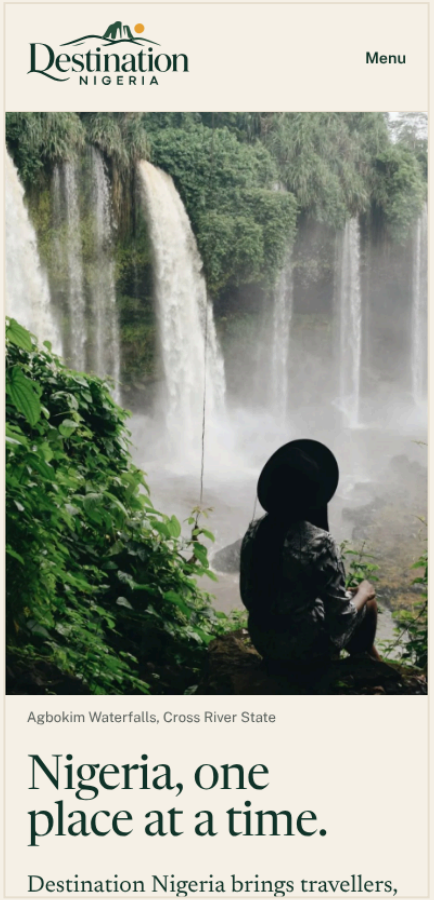
Telephone	+234 909 884 3308
General	info@destinationnigeria.org
Eddie Madaki	eddiemadaki@destinationnigeria.org
Lulu	lulu@destinationnigeria.org
Web	destinationnigeria.org (confirm before print)

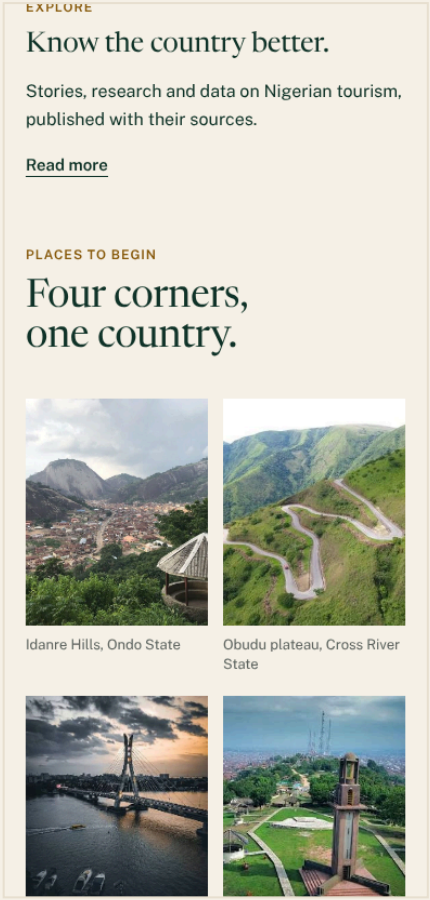
Card specification

85 × 55 mm, 3 mm bleed, 4 mm safe area. Print PDFs with and without crop marks are in 09/BUSINESS_CARDS. No roles are shown because none were supplied; add them in cards.py once confirmed.

Website



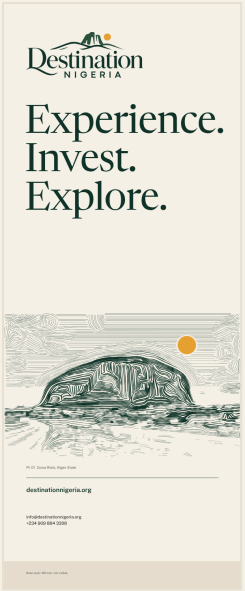




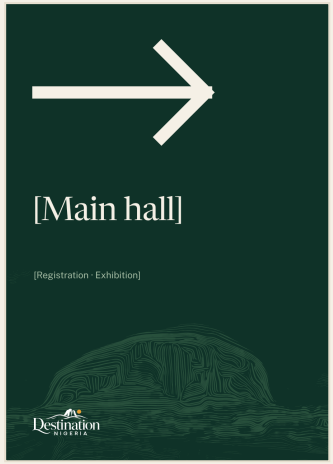
Homepage design, desktop and mobile, built from tokens/dn-tokens.css and components/dn-components.css: square buttons, hairline structure, captioned photography, AA contrast throughout.

Events and signage

Built at physical size with vector plates, so large formats stay sharp. Event names, dates and partners remain placeholders until confirmed.



Roll-up

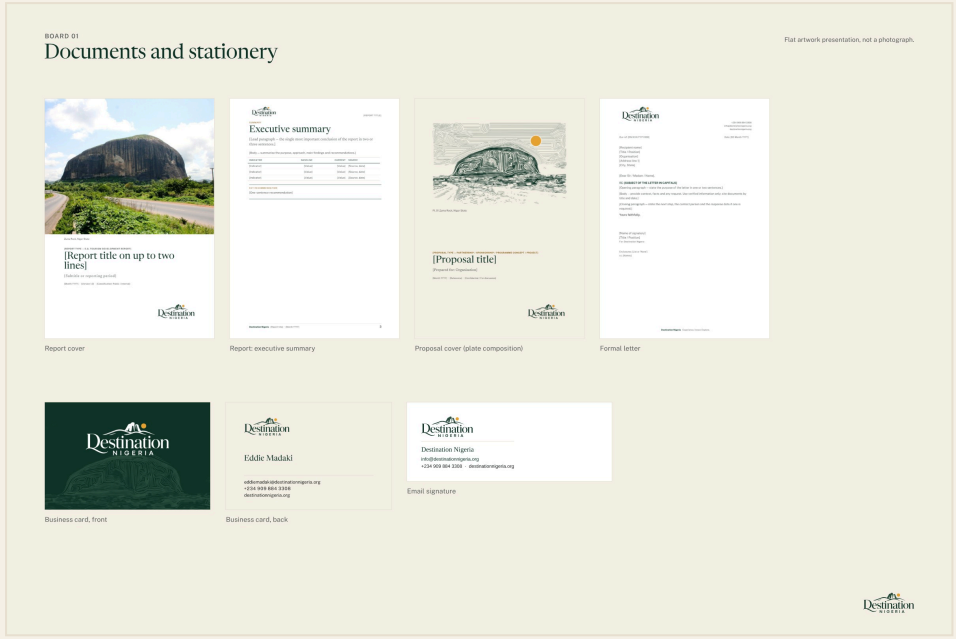


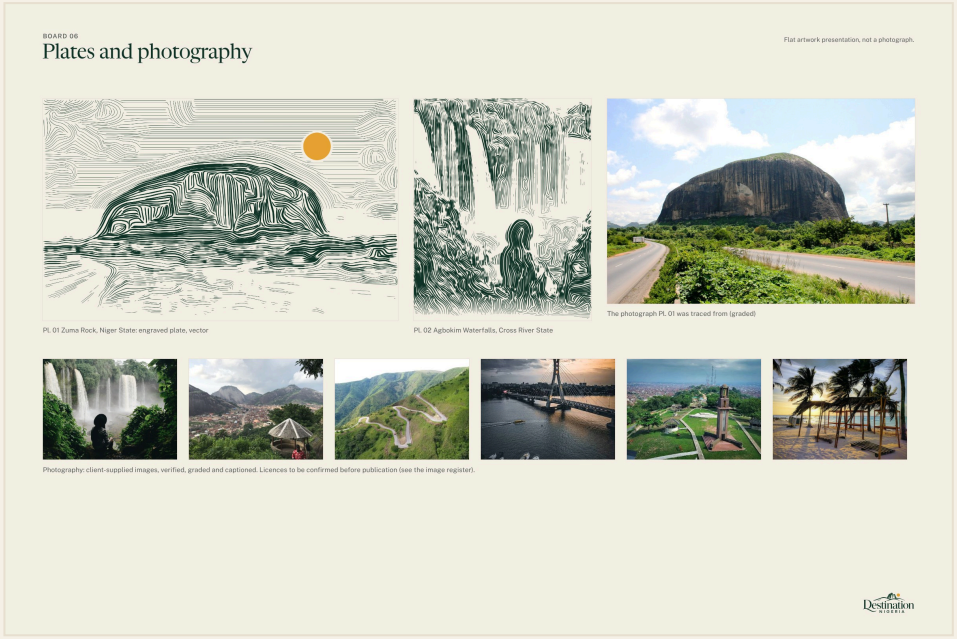
Wayfinding A2

Stage screen

Badge A6

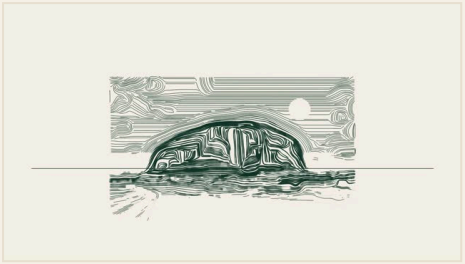
Presentation boards





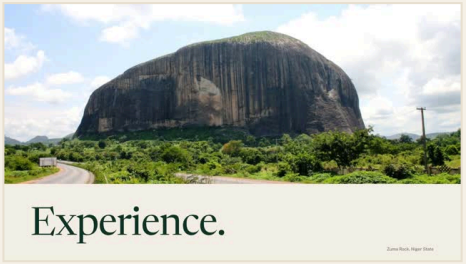
Presentation boards: flat artwork, labelled as such. The v1 'device' mockups are retired.

Motion



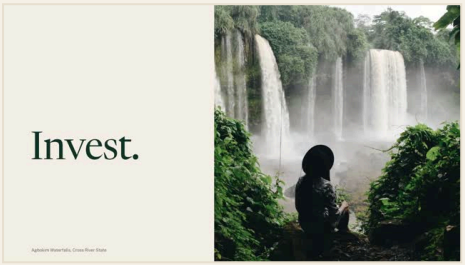
2.6 s

4.6 s

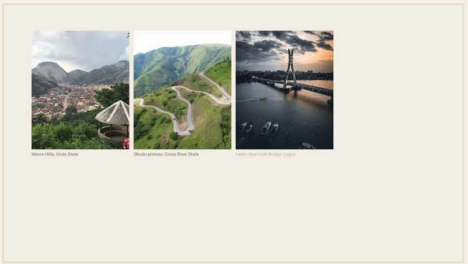


8.5 s

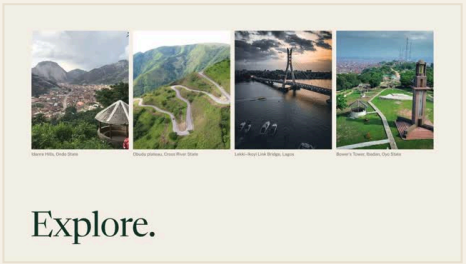
11.0 s



13.8 s



16.8 s



18.5 s

24.5 s

The film

25 s, four formats. A plate of Zuma Rock is engraved stroke by stroke, the sun sets in place, and the plate becomes the photograph it was traced from.

Principles

Hard cuts on the downbeat, unhurried moves, one thing at a time. No blooms, rings, swooshes, particles or pop-in cards.

Files

07/BRAND_FILM_25s, LOGO_ANIMATIONS (logo reveal and sting, with alpha versions) and LOOPS (a seamless plate loop).

Sound

Sonic logo

6.5 s. Shekere, then a talking-drum phrase ("Ex-pe-rience"), then a rising thumb-piano line. The sun lands on a bell at 3.3 s.

Sting

2.5 s. The same motif compressed, for the ends of stories and short videos.

Film score

25 s in 12/8 at 96 bpm. The burin's scrape, then the groove, then the motif. Every cut and word lands on a cue shared with the picture.

All audio is fully synthesised: original, sample-free and owned outright. 48 kHz / 24-bit WAV and 320 kbps MP3, loudness-normalised to −16 LUFS. Files are in 08_SONIC_IDENTITY.

Clear, warm, assured

CONTEXT	EXAMPLE
Campaign	"Nigeria, one place at a time."
Destination	"At first light the rock turns from grey to amber. Bring water and good shoes."
Investment	"This profile summarises the opportunity, its development stage and the documents available on request."
Media	"Destination Nigeria today announced…" (verified facts only)

Do

Use short sentences, specific nouns and active verbs. Name the place and the state. Credit communities and photographers. Use numbers only when they are sourced.

Don't

Use clichés ("hidden gem", "land of contrasts"), overclaim, stereotype, or imply endorsements, partners or schedules that have not been confirmed.

Style

British English. Write "Destination Nigeria" in full; never "DN" in public copy. Write the proposition in sentence case: Experience. Invest. Explore.
