SHEET 06 · ARTWORK & BUILD GUIDE

BUILDING ON EAGLE SQUARE

Event **13 Dec 2026, gates 16:00**
Headline **Wizkid, 22:00**

ARTWORK

- Supply artwork at the exact slot size: width × 10 ft high.
- Vector PDF or AI with fonts outlined, CMYK. Raster images at 100 dpi at full size.
- Keep logos and copy inside a 6 in (150 mm) safe margin. Add 2 in (50 mm) bleed.
- Keep key messages above 3 ft from the ground. Crowds block the bottom of each wall.
- Name files with your slot code, e.g. `T03_BrandName_50x10.pdf`.

THE VENUE

- Eagle Square is a concrete parade ground of about 3 ha with about 2 ha of parking, on Shehu Shagari Way in the Central Business District.
- The surface cannot take stakes or anchors. Every frame stands on ballast or weighted bases.
- December is Harmattan season: dry, dusty and gusty. Use wind-permeable mesh on long walls and wind-rated frames.
- The event runs after dark, so light or backlight any wall you want seen after 18:30.

ON SITE

- Every pink line on the plans is a barricade line. Do not move, lean on or fix branding to barricades without production sign-off.
- Walls stay inside the slot's footprint. Nothing projects into a walk lane, corridor or crash-barrier zone.
- Activations in the Brands Experience Zone need a separate layout approval: power, staff numbers and footprint depth.
- Build and strike times are issued by production after slots are confirmed.

Before you print, confirm with production: (1) gate and road names around the site; (2) footprint depth behind each wall and in the Brands Experience Zone; (3) the 80 × 10 ft slots V18–V19, which are drawn shorter than their stated size on the supplied plan; (4) turnstile count (the validation drawing shows 7). All sizes come from the organiser's floor plans. The plans are diagrammatic, so a site survey confirms the final dimensions.
