V19	80 × 10 ft	

NOTES FOR BRANDS

- Sizes are width × height. Every wall is 10 ft (3.05 m) high. Send print-ready vector artwork (PDF/AI) at the exact slot size, named with your slot code.
- Eagle Square is a concrete parade ground. Nothing can be staked, so all frames stand on weighted bases.
- December is Harmattan season (dry, dusty, gusty). Long walls use wind-permeable mesh. The show runs after dark, so light your wall if you want it seen at night.
- Pink lines are barricades. Do not fix branding to them without production approval.
- Plans are not to scale. Production confirms final dimensions on site.
