Destination Nigeria — Typography Specification v1.0

All brand typefaces are released under the **SIL Open Font License 1.1**. They are free for commercial use, embedding and redistribution, and the licence texts are included in `fonts/`. All three are available in **Google Workspace** (Docs, Slides) from the font menu, and on the web through Google Fonts.

Role	Typeface	Weights supplied	Office fallback	Web fallback	Use
Display	**Playfair Display**	Regular, Medium, SemiBold, Bold + Italics	Georgia	Georgia, 'Times New Roman', serif	Display headlines, document titles, campaign lines. Echoes the high-contrast serif of the wordmark.
Editorial	**Source Serif 4**	Regular, SemiBold, Bold + Italics	Cambria	Georgia, Cambria, serif	Long-form editorial reading, report introductions, pull quotes, captions in print.
Sans	**Inter**	Light, Regular, Medium, SemiBold, Bold, Italic	Calibri	'Segoe UI', Calibri, Arial, sans-serif	UI, body copy in documents, labels, tables, data (tabular figures), overlines echoing NIGERIA.

Data and numerical typography: **Inter** with tabular figures (`font-feature-settings: 'tnum' 1`, which is on by default in the kit's CSS for tables). Use Inter Light for large KPIs and Inter SemiBold for labels. Optional campaign headline: **Playfair Display Italic** (Medium). Use it for one line per piece at most, never in full paragraphs.

Hierarchy (digital px · print pt)

Token	Face	Weight	Size px	Print pt	Line height	Tracking	Use
`hero`	Playfair Display	500	72	54	1.04	-0.01 em	Hero headlines, campaign posters, cover titles
`h1`	Playfair Display	500	48	30	1.1	-0.005 em	Section headings, slide titles, document titles
`h2`	Playfair Display	500	34	20	1.15	0 em	Sub-section headings
`h3`	Inter	600	22	13	1.3	0 em	Subheadings, card titles

Token	Face	Weight	Size px	Print pt	Line height	Tracking	Use
`overline`	Inter	600	13	8	1.4	0.22 em	Eyebrows / kickers in caps, echoing NIGERIA in the logo
`lead`	Source Serif 4	400	21	13	1.5	0 em	Standfirst, introductions, executive summary lead
`body`	Inter	400	16	10.5	1.6	0 em	Body text (digital); 10.5 pt in documents
`body-editorial`	Source Serif 4	400	17	10.5	1.6	0 em	Long-form print reading; 10.5 pt in reports
`caption`	Inter	400	13	8.5	1.45	0.01 em	Captions, image credits, metadata
`footnote`	Inter	400	11	7	1.4	0.01 em	Footnotes, legal lines, sources
`table`	Inter	400	14	9	1.35	0 em	Tables, with tabular figures (font-feature-settings: 'tnum')
`data`	Inter	300	64	40	1.0	-0.02 em	Key statistics / KPIs (Inter Light, tabular)
`button`	Inter	600	15	9	1.0	0.04 em	Buttons and labels

Rules

- Headlines are sentence case in Playfair Display. Don't set long headlines in all capitals in the serif.
- Overlines and labels are set in **Inter SemiBold, ALL CAPS, +0.22 em**. This echoes the spaced NIGERIA in the logo.
- Keep to two typefaces per page: Playfair with Inter, or Source Serif with Inter. Playfair with Source Serif on its own is acceptable only in long editorial documents.
- Body text is ranged left with a ragged right. Don't justify text on screen.
- Ideal line length is 60–75 characters.
- Use real quotation marks (“ ”), en dashes for ranges (2026–2027), and the ₦ symbol for Naira. **Playfair Display has no ₦ glyph and no tabular figures, so always set prices, currency and data in Inter.** Inter and Source Serif 4 both include ₦ (U+20A6).
- Never stretch, outline or add shadows to type.

Installing

- **Windows:** right-click each `.ttf` in `fonts/` → *Install for all users*. **macOS:** double-click → *Install Font*.
- **Microsoft 365 / Word / PowerPoint:** install the fonts first. When sending editable files to people who don't have the fonts, either embed them (*File → Options → Save → Embed fonts in the file*) or tell them which fallback to use: Georgia for Playfair Display, Calibri for Inter.
- **Google Docs/Slides:** *Font → More fonts*, then add Playfair Display, Inter and Source Serif 4.
